

YOUR ORDER WRITING APP

Built for the way you actually sell.

● Writing the order

- Start an order before you pick a Buyer, so you are writing sooner
- Write orders straight from a catalog
- Build an order from a Buyer's past orders
- Select Price Codes on the fly, and item by item on the same order

● Getting it submitted

- Fewer failed order submissions
- Clear alerts you can act on yourself instead of stopping to call
- Manufacturer account numbers checked up front, before an order bounces

● Finding what you need

- Full order history on your device
- Order Writer and Sales Rep filters on Find Orders
- Item history shown right inside your catalogs
- Copy items out of a past order and reuse them

● Handling the details

- Product Lines supported, including order splits by Product Line
- Internal notes on orders for your team
- Order Taker selection for accurate attribution
- Barcode scanning built in

● Staying current

- Data syncs automatically whenever you are connected
- Product, pricing and Buyer data current when it counts
- New features arrive on your device as they are built

● When something goes wrong

- Support tools built to get you back to writing quickly
- System messaging so you know what is happening and when
- Alerts that tell you what to do, not just that something failed

Works with or without a signal.

Full offline order writing. Write on the show floor, in a back room, or anywhere the wifi gives out, then sync when you are back online. This is the piece a browser cannot do, and the reason mtPro matters most during market week.

This year we shipped 20 improvements. Every one came from you.

Each one started as something a Sales Rep, an Agency, or a Brand told us was getting in the way.
